

I don't support this ARRL (RM-10867) document. As an Extra class license holder, they are giving away freq allocations that we worked very hard for. Also, under the ARRL proposal, the General class holders are picking up an additional 25kcs more frequency spectrum then Extra class holders on many bands. Please don't award some Amateur license classes more privileges then others. If you're going to award the General class 100kcs of additional freq spectrum, then also award us Extras the same additional amount. That is simply fair! Also, I feel that Extra class holders should keep as exclusive, the bottom 25kcs of the CW portion of the bands as we have now.
